THE TECHNICAL FEAT FOR THE OPEN TITANIUM BANGLES LAY IN THE PURSUIT OF THE PERFECT CURVE. TITANIUM, A VERY DENSE MATERIAL, REQUIRES THE BRAND TO UNDERTAKE AN EXTENSIVE SEARCH FOR EXPERTISE.

The bi-material version of Titanium and gold constitutes the perfect match between two incompatible characters, but the brand's expertise lies in overcoming all technical challenges. 92 hours of work per product are required for the titanium to perfectly embrace the gold on its surface.
