

# AKILLIS

JOAILLERIE PARIS

## BLUE TITANIUM

Once again, Akillis is defying the strict codes of the Place Vendôme, it charts new territory, fusing exquisite jewelry craftsmanship with technological innovation. Venturing where few jewelers dare to go, the Akillis workshops move beyond their traditional, flawless savoir faire with a breathtaking twist: working with titanium.

LIGHTWEIGHT, INDELIBLE, AND INVINCIBLE, TITANIUM WAS ADAPTED FROM HIGHTECH INDUSTRIES AERONAUTICS AND LUXURY WATCHMAKING TO BECOME GOLD'S NEXT RIVAL.

Over the years, Akillis has gained utmost expertise in this unique material: while extremely difficult to transform, the workshops succeed at perforating, cutting, shaping, and assembling with masterful finesse, creating delicate pieces with complex shapes and assembly.

*Bang Bang bracelet  
Blue DLC titanium  
320 € - 335 \$ - 320 CHF - 260 GBP*

*Capture Me bracelet  
Blue DLC titanium  
850 € - 890 \$ - 850 CHF - 740 GBP*

## A NEW ACHIEVEMENT: BLUE TITANIUM.

Yet again, Caroline Gaspard transforms a jeweler's dream into reality, breaking the boundaries of technique to highlight the emblematic blue of the jewellery house. The iconic Capture and Bang Bang bracelets are now sporting a deep blue color, becoming the must have of this summer.

Titanium is merging high-end technology, traditional jewelry expertise and comfort. **This time, AKILLIS titanium gets a blue matte makeover when finished with DLC (Diamond Like Carbon) an immutable carbon material sharing diamond's properties which is bound to the surface in layers through a vacuum treatment process.**
